GENERAL NOTES

- The contractor to be responsible for:
- Verifying all drawings, specifications, dimensions and measurements as well as site, conditions and notifying the designer of all discrepancies and omissions before commencing the works.
 - Submitting samples and shop drawings for review and approval by designer before commencing works.
 - Ensuring that all work is keeping with all International building codes.
 - All necessary repairs, patching and cleaning of site during and after completion of works.
 - Verifying existing site conditions prior to submissions of quotations.
 - Not starting the construction unless these drawings are signed approved.
 - All work specified on all drawings and specifications and supplying all necessary materials and labour required to complete all phases of work in accordance with the designer's standards.
 - All dimensions in millimeters
